Software Engineer | Java | Spring | Microservices | Angular | JS | Full Stack Developer

Summary

- Around 5 years of experience in Java/J2EE, Angular, Software Development Life Cycle, Object Oriented programming, developing, and testing of Client/Server, Enterprise, and Web Applications
 - Expertise in Core Java concepts such as OOP concepts, Collections Framework, Exception Handling, I/O System, Multithreading JDBC, Reflection and Generics.
 - Proficient in the development of client/server and web Applications using JAVA, Spring technologies and Web Technologies such as Angular for enterprise applications.
 - Strong experience in developing UI using HTML5, JavaScript. Typescript, AngularJS, Angular.
 - Involved in internal architectural changes both for product and acceptance test framework.
 - Experience on AWS cloud services like EC2, S3 for installing and configuring.
 - Working experience in MAVEN and Jenkins for project build/test/deployment, Log4j for logging and JUnit for unit and integration testing.
 - Experience in Test driven development (TDD) using unit testing frameworks such as Junit.
 - Working knowledge on Version control software such as SVN and GIT & Strong knowledge of IDEs like Eclipse, VS Code, IntelliJ, Android Studios.
 - Involved in all stages of Software Development life cycle (SDLC) as well as Agile/Scrum workflow.
-

Skills

Languages:	Java (1.8/11/17/21), TypeScript, JavaScript, SQL
Technologies:	Spring 3.0, Spring boot 6.0, Angular, HTML 5, JavaScript, Typescript, CSS3
Platforms:	Windows, UNIX, LINUX
Testing Tools:	JUnit 4.x
Version Control:	GIT, SVN
Methodologies:	Agile Methodology
Build Tools:	Maven 3.x

Experience

Intellicus Technologies Pvt. Ltd., Indore

Software Engineer

Dec 2022 - Present

Responsibilities:

- Developed and deployed features for the Kyvos BI tool, including Gen AI integration, enhanced export capabilities (PDF, image), and client-specific JS API solutions. Prioritized client satisfaction through consistent communication, proactive updates, and the delivery of features, such as a summary card enhancement, often ahead of deadlines. Collaborated effectively with teammates to ensure project success.
- Developed across the full stack, utilizing Angular for the front-end and Java Spring and legacy Servlets for the back-end. Also undertook initiatives to update Angular application-wide.

Summary:

- Developed and implemented key features for a BI tool, utilizing Angular for front-end development and Java Spring and Servlets for back-end. Delivered features such as cascading filters, self-service enhancements, and Gen AI integration, while ensuring high-quality code and adherence to best practices. Demonstrated a commitment to timely delivery and client satisfaction, often providing solutions ahead of deadlines and maintaining proactive communication throughout the development process.

Environment: Java 17, Spring, Angular 17, HTML5, CSS3, Bootstrap, JSON, Typescript, Ag grid, Sonar, Agile, Scrum, Jira, Junit, REST, GIT, Tomcat

Xoriant Solutions Pvt. Ltd., Pune

Software Engineer

Nov 2020 - Dec 2022

Responsibilities:

- Develop the Backend component architecture using Java 8, Spring, libraries such as Tabula for PDF table extraction and processing. Develop the UI component architecture for developer framework using Angular. Typescript, HTML5, CSS3 and Bootstrap.
- Created custom, self-contained, reusable, and testable Angular/Spring modules, controllers, directives and services to implement key functionalities for customer account. Worked with Agile methodology and actively participated in Scrum meetings as a part of SDLC, to produce quality deliverables within time.

Summary:

- Developed Spring and Angular modules which are integrated as per the User/Tech/Spike stories provided by the Client.
- Developed tool to parse PDF such that tables present in PDF is extracted and all the data is processed according to the Client needs which made client process much more easy and efficient, also significantly reducing time to complete the whole process.
- Integrated all functionality with Angular UI which involve setting up the routing configuration, developing sub views according to the UI wireframes provided by the Client, also provided my feedback for best user experience.
- Worked simultaneously in both production and development teams and took part in designing and developing dynamic web pages, also in developing better data model for the project.
- Worked on Ag Grid library for Angular implementing pagination, segmentation loading, export to csv/excel.

Environment: Java 8, Spring, Angular, HTML5, CSS3, Bootstrap, JSON, Typescript, MongoDB, Oracle DB, Ag grid, Tabula, Sonar, Agile, Scrum, Jira, Junit, REST, GIT, Tomcat

Android Developer at IBM, Delhi

Trainee

Jun 2018 - Aug 2018

Responsibilities:

- Completing tasks given by the trainer, also completing a full project from scratch with persistence database and user, admin functionality.

Summary:

- Worked on Project MediBook - Health Care Booking Using Android, Core Java, Android Studios, XML, Google-Firebase for a duration of 6 weeks at Allsoft Solutions & Service Pvt. Ltd.

Environment: Android Studios, Java, Google Firebase for authentication and storing data.

National Center for Antarctic and Ocean Research, Goa (NCPOR)

Intern

Jun 2017 - Aug 2017

Responsibilities:

- Reading large datasets from year 2005 – 2016 of glacier movement in Antarctica using Matlab.

Summary:

- Visualization of Ice Velocity of Glaciers from Antarctica using Matlab which involves creating scripts to process data in desired format and developing GUI to show the data.
-

Education

Guru Jambheshwar University of Science and Technology, Hissar, Haryana.

B. Tech Computer Science and Engineering

Awards

- **Star of the Month – Intellicus – Feb 2025**
- **Spot Award – Xoriant – May 2022 and March 2023**
- **Smart India Hackathon Winner – SIH India – March 2019**
- **Winner of Smart India Hackathon 2019 April**
